

Russell Dudek

AI Workflow Enablement & Adoption Analyst

Operator-technologist who turns emerging AI capability into adopted work. Hands-on in workflow design, structured context, human review, governance, evaluation, training, and operating mechanisms that make value visible.

ROLE-ALIGNED CAPABILITIES

ChatGPT & LLM workflows	Prompt and context design	Workflow automation
Human-in-the-loop governance	Use-case prioritization	Adoption & enablement
Evaluation and iteration	Cross-functional playbooks	Operating metrics

EXPERIENCE SELECTED FOR THIS WORK

Vape-Jet 2025-Present

Director of Operations

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connects factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Works directly in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

DudeWorth 2017-Present

Founder / AI and Automation Advisor

- Develops AI-readiness and opportunity frameworks that assess value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation, and governance rails.
- Advises on AI-enabled operations, logistics technology, automation, network analysis, and workflow design.

Amazon 2014-2018

Operations Management / Site Leader

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work, and operating mechanisms.
- Applied Lean and Gemba practices across safety, quality, throughput, customer experience, and team engagement.

MECHANISMS I BRING TO THE ROLE

Workflow intake

Frame value, sources, data boundaries, retained human judgment, and success measures before building.

Prompt and context contract

Structure instructions, examples, source use, exception behavior, escalation, and evaluation.

ADDITIONAL TECHNICAL AND OPERATING DEPTH

Compunetics 2000-2013

Director of Operations and Engineering Management

- Progressed through R&D program management, production management, strategic acquisition, operations management, and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures, and process controls.
- Collaborated with high-consequence customers and partners including DoD, CERN, Intel, and AMD; published industry articles, delivered technical talks, and participated in the HyperTransport Consortium.

Cardinal Building Products 2021-2023

Regional Director

- Built the company's first remote regional operation.
- Modernized distributed customer, CRM, commercial, fulfillment, logistics, digital marketing, SEO, and online-buying workflows.

ZeusVu 2018-2022

Chief Pilot, Autonomous Systems and Aerial Data Operations

- Led regulated drone operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence.

ENABLEMENT AND MEASUREMENT

Enablement loop: pair demos with practice, job aids, office hours, champions, and repeated use in real work.

Adoption scorecard: connect activity to workflow change, quality, economics, trust, ownership, and learning speed.

IEEE 2012-2016

CMPT and EDS Pittsburgh Chapter Chair

- Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing, and emerging technology.
- Organized conferences, seminars, business tours, and technical programming.

EDUCATION

University of Pittsburgh

Bachelor of Science

Academic grounding in materials science, physical chemistry, and biology-related studies.

SELECTED CREDENTIALS

Google AI Essentials

IBM Enterprise Design Thinking Practitioner

Six Sigma Certification

TECHNICAL TOOLKIT

Agentic AI · LLM workflows · RAG patterns · Human-in-the-loop design · Python · SQL · JavaScript · TensorFlow · Tableau · ERP/Odoo · Jira · Confluence · HubSpot · Slack

HOW THIS MAPS TO VOLTO

Direct workflow execution, operating discipline, technical translation, training, and governance - applied to making ChatGPT capability useful, safe, repeatable, and measurable.

DIRECT CONTRIBUTION PROFILE

Build: use-case frames, prompt/workflow patterns, pilots, evaluation criteria, and playbooks.

Enable: demos, practice sessions, office hours, champion coaching, and standard work.

Govern: sources, data boundaries, human checkpoints, ownership, escalation, and review cadence.

Measure: adoption depth, cycle time, completeness, rework, repeatability, and labor hours avoided.

CANDIDATE VISION
